Side Projects (1.25rem) Patent Submission, 02.12.19, 16/273,153 Energy Source Holder System For the last 6 years I have been teaching myself how to write and submit a patent, which I submitted in February, 2019. The expected prosecution start date is August 2020 which I'm very much looking forward to, I think:). In 2013 I had a an idea. After doing some research and prototyping, I realized that it would be a great challenge to learn what the patent process really was. The objective wasn't to instantly turn myself into a patent attorney or to make millions off an invention. Learning the process has always been my objective and mimics how I approach all jobs I take on.
